DETAILED ACTION

1. This action is responsive to the Applicant's Amendment filed on 01/06/06.
2. Claims 1-5 and 8-13 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appear below. Should the change and/or additions be unacceptable to the Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it MUST be submitted no later than the payment of issue fee.

Authorization for examiner's amendment was given in a telephone interview with Mr. Marc A. Boillot Registration No. 56, 164 on 03-07-2006. The amendment was made to clarify the claim language as follows:

In the claim:

At line 9-11 of claim 5, change

"building a workload from said work request by replacing redundant command sequence in said work request with said command pattern; and"

"executing said copied commands workload for responding to said work request." to

"building a workload from said work request by replacing redundant command sequences in said work request with said command pattern by"

"assembling at least one reference command object with other reference command object copied into a configuration file to create said workload; and"

"executing said copied commands workload for responding to said work request[.]."

"wherein said reference command objects are combinable for dynamically adjusting the reallocation, redistribution, and rescheduling of resources across multiple e-business systems."

In the claim:

At line 11-15 of claim 12, change

"building a workload from said work request by replacing redundant command sequence in said work request with said command pattern; and"

"executing said copied commands workload for responding to said work request." to

"building a workload from said work request by replacing redundant command sequences in said work request with said command pattern by"

"assembling at least one reference command object with other reference command object copied into a configuration file to create said workload; and"

"executing said copied commands workload for responding to said work request[.]."

"wherein said reference command objects are combinable for dynamically adjusting the reallocation, redistribution, and rescheduling of resources across multiple e-business systems"

Authorization for examiner to cancel claims 6 and 7 was given in a telephone interview with Mr. Marc A. Boillot Registration No. 56, 164 on 03-14-2006.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Prior art record, Saw et al., taken either singly and/or in combination with other cited prior arts, do not teach or disclose a method as recited in independent claims 1 and 5, a machine readable storage as recited in claims 8 and 12 as pointed out by applicant on pages 13-16 of remark filed on 01/06/06 with the following features:

Assembling said at least one referenced command objects with other reference command objects copied into said configuration file to create said workload; wherein said reference command objects are combinable for dynamically adjusting the reallocation, redistribution, and rescheduling of resources across multiple e-business systems.

The closest prior art is Saw: U.S. Patent 5,345,450, which teaches the generation of sufficient simulation data to automatically generate a test program from the simulation data is presented. The vector input and output data are specific for the device being tested and the system requires an understanding of the from a programmatic perspective in order to ensure appropriate functionality of the simulator. In addition Saw teaches the duplication of the input vectors for the purpose of expanding the set of test vectors used to generate the test program..

However, Saw et al., taken either singly and/or in combination with other cited prior arts, do not teach or disclose a method as recited in independent claims 1 and 5, a machine readable storage as recited in claims 8 and 12 as pointed out by applicant on pages 13-16 of remark filed on 01/06/06 with the following features:

Assembling said at least one referenced command objects with other reference command objects copied into said configuration file to create said workload; wherein said reference command objects are combinable for dynamically adjusting the reallocation, redistribution, and rescheduling of resources across multiple e-business systems.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
